HEATSINK NOTE

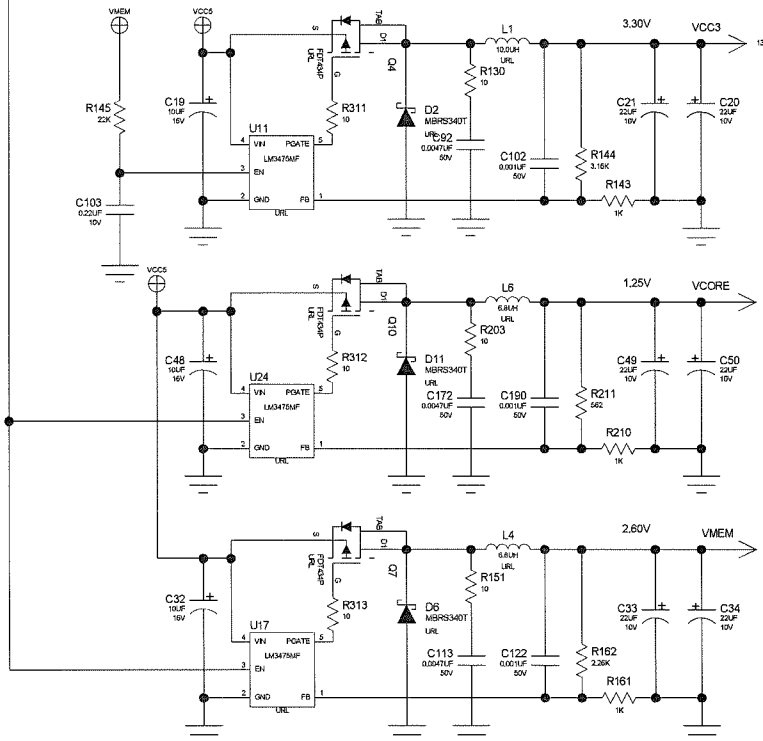

* Requires 1 square inch copper pad for heatsink on pins 5, 6, 7, & 8

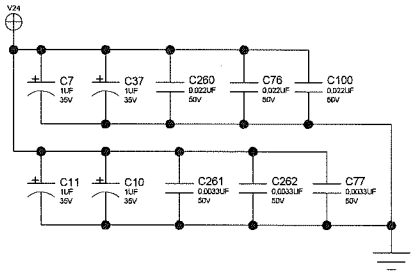

** Requires .5 square inch copper pad for heatsink on pins 5, 6, 7, & 8

DESIGN NOTE: Enable on VCC3 is used to ensure that VIO powers up (< 1ms) after VCORE, This guarantees that the TFT interface will power up glitch free.

10V MAX for Regulator

Vout = ([R1 + R2) / R2) * 0.8V

DESIGN NOTE: This design uses LVD to generate system reset. Since LVD only monitors Vcore, the designer must guarantee that Vio and other required voltages are valid at or before Vcore. If this cannot be guaranteed, then RESET_WORK# must be used to hold system in reset until Vio and Vcore and any other required voltages are valid.

SYSTEM POWER

V24=+24.0V

VCC5=+5.0V

VCC3=+3.30V

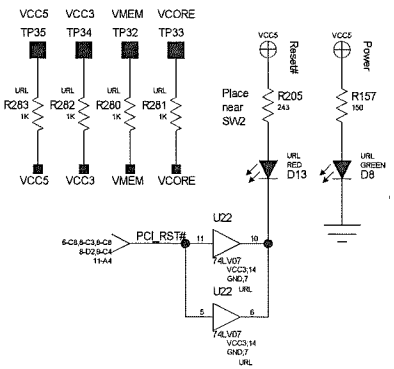

LX800 and CS5536 andMemory

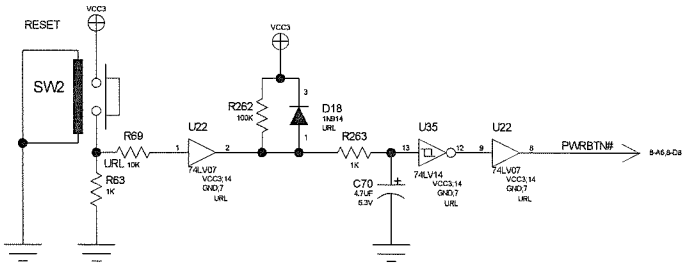

VCORE=+1.25V

VMEM=+2.60V

MVREF=+1.3V

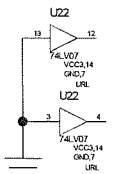

VIO=+3.30V

Power On and Reset Sequence

12V DC → PWRBTN# Geode_in → WORKING Geode_out → LVD → SYS_RST# → PCIRST# Geode_out

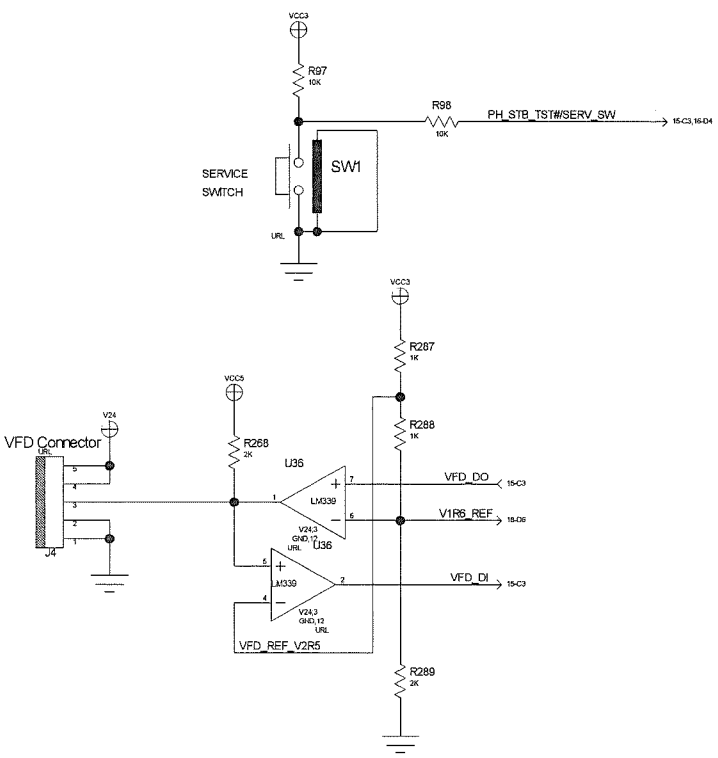

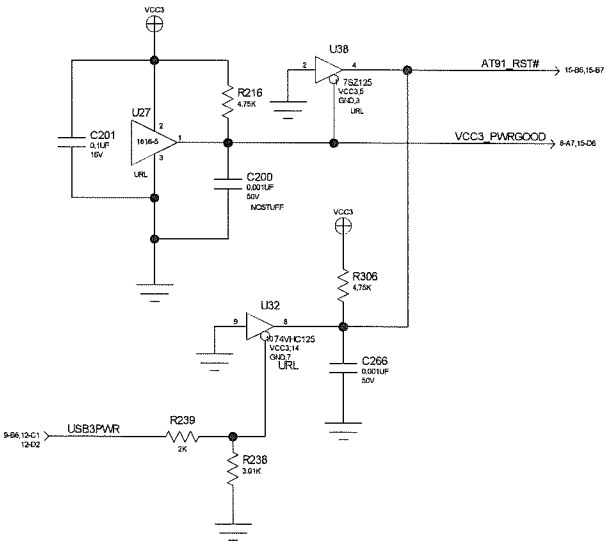

Vcore & Vio - 90% in 10us - 1s

.4V in 100ms - 5s

Section D - Embedded Software Group USB Product Id Table

Embedded Software Group
USB Product Id Table

The purpose of this document is to record the Product IDs of Hobart USB Peripheral Devices. The Vendor ID or use by ITW Food Equipment Group, doing business as Hobart Corporation, is 0x128C. These two pieces of information need to be present in the Device Descriptor used during USB Device Enumeration by the Evolution Scale.

- Miscellaneous Products will be added using 0x00yy.
- New USB printers will be added using 0x02yy.
- New USB wrapping devices will be adding using 0x03yy.
- New USB weighing devices will be added using 0x04yy.
- The yy part of the Product ID is the device number.

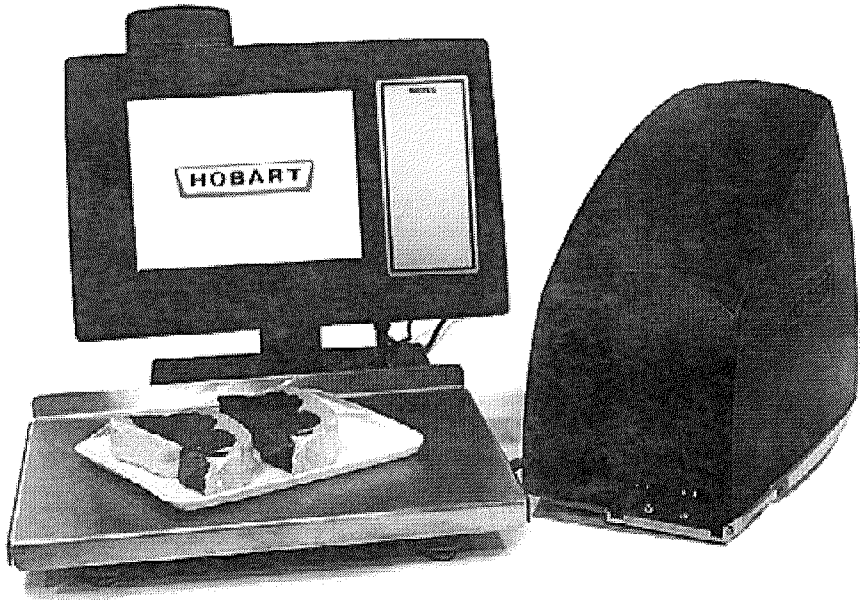

For devices that have need code downloaded to them in order to run, or to update a current code residing on the device, the most significant bit will be set to a 1. The device will use its natural Product ID for the remaining 15 bits. Any other devices may be added in sequence starting with 0x0001.

Product Id:	Device:	Added By:	Date:
0x0000	Unknown – Error Condition	Thomas M Fink	6/28/2005
0x0001	LSMN/USB Converter Device	Stephen M Manger	06/04/2003
